ULTRAFLEX
PREMIUM HARD WAX MICRO BEADS

Ultra-flexible. Multidirectional. Quick Setting. Rosin-Free. Vegan.

Introducing Ultra Flex, our innovative low-melting-point wax beads designed for a superior waxing experience. The vegan-friendly formula boasts a unique blend of synthetic resin and high elastic polymers, ensuring optimal flexibility for easy, precise application. Ultra Flex can be applied thin and dries quickly, yet remains pliable to streamline the waxing process for faster, more comfortable results. With a melting point closely aligned with body temperature, it's ideal for delicate and sensitive skin, offering gentle yet effective hair removal.

USAGE:
Begin by placing the wax in the heater, heating it at maximum temperature. Stir occasionally until the wax is completely melted and exhibits an even texture. Adjust the heater to medium heat and wait for the wax to reach the recommended application temperature, approximately 65–70 °C. To ensure readiness, dip the spatula into the wax and scoop an amount suitable for the treatment area. Rotate the spatula until a ball forms. At the correct temperature, the ball should rotate without dripping for at least 2–3 seconds. For a visual guide to the ideal application texture, simply scan the QR code provided. Apply the wax using the spatula, taking care to ensure clean edges for maximum strip efficacy. Allow the wax to dry for a few seconds until it starts to harden. Hold the surrounding skin taut and remove the wax by firmly tugging the strip in the opposite direction of application.

WARNING:
Before application, ensure the product's temperature is comfortable by testing it on your forearm, and be sure not to exceed the recommended melting temperature. Choose well-ventilated spaces, avoiding strong heat sources during application. Refrain from ingesting the product or applying it to damaged skin. After waxing, avoid sun exposure and UV rays for at least 48 hours. Do not heat the product in a microwave or bain-marie. Please note that the natural ingredients may cause subtle color changes.
